Position:	<ul style="list-style-type: none"><li>Centre Forward (target man) (preferred)</li><li>Left - winger</li><li>Central attacking midfielder</li></ul>
Foots:	Right
Player profile:	I have played in many representative teams both in club and school environments, representing in multiple titles and championships. Being captain of almost every team I have played for set the path for me to take control of my own team and players. Football is about possession of the ball and offensive strategies. The defenders they can't just defend and the strikers they can't just try to score goals. Everybody needs to be involved in the way to play good soccer to make the difference. A good football player has the knowledge to pass the ball between the defenders to leave the striker one to one against the goalkeeper, also to try and get in behind the defence and create opportunities. I like that direct style of play, taking on the defender, before getting that cross in. A good point is to help push the players and the team forward and in turn they will push you forward as well.
Achievements:	My goal is as well to become a coach for a long term commitment within the right soccer club, who trust in me, to to build together a new style of play soccer, helping the future generations to become professional football players, and to win titles. I know how to play good style of football (touch and touch the ball), and the most important: enjoy playing football. I am ready to share my knowledge because I know the pathway to become a professional football player and I am ready to put 100% of me to achieve the goals.
